PROFILE

I am a student of systems engineering, and I have been part of different projects related to the area of application development mobile, and web platforms. By collaborating in these projects I have gained experience working as a team and improving the use of different technologies for development. My skills include the use of programming languages and database.

EDUCATION

System Engineer by the Technological Institute of Valleys City

ACHIEVEMENTS

Participant in the National Student Event of Technological Innovation (ENEIT) with the development of a mobile application called "Notify"
Participant in the technology fair of the technological institute with the development of a web platform "GOAM".
Participant in the University Tournament Apps for Entrepreneurs TUAPPSANLUIS Edition 2018 where we reached the final stage of the contest with the application "Notify"
